

DC DIRASLYDE E2

Biocidal Conveyor Lubricant

Availability

Description

DC Diraslyde E2 is a controlled foam, synthetic, conveyor lubricant for broad application conveyor systems.

Typical Properties

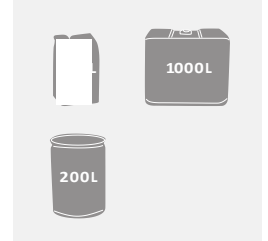

Appearance: Pale straw liquid
Specific Gravity: 0.98 – 0.03
pH: 5.5 – 6.8

Approvals

- Halal (pending)
- Kosher

Applications

- Suitable for most conveyor lubrication applications in the brewery, beverage, dairy, wine and spirits, and juice industries.

Features	Benefits
Effectiveness	Provides good lubricity with low in-use concentration. Consistent when applied via proportional dosing equipment.
Foaming Properties	Low foam
Speed	Suitable for slow to high-speed lines
Versatility	Suitable for soft to hard water conditions

Use Directions

- Do not mix with other chemicals.
- Apply at 0.15 – 0.30% (v/v) depending on water conditions and conveyor line speed.

Availability			
DC Diraslyde E2 is available in:	 20L Poly	 200L Drum	 1000L IBC
Material Code:	DCDIRASLYDEE2-20L	DCDIRASLYDEE2-200L	DCDIRASLYDEE2-1000L

Handling Precautions

- Do not allow DC Diraslyde E2 to come in contact with skin or eyes.
- Protective clothing including overalls, face shield, PVC boots and PVC gloves should be worn when handling DC Diraslyde E2.
